PREPOPULATE

- Pre-fill form fields based on URL params

  - increases speed, reduces errors

```
<a href="node/add/event?edit[category]=concert"
      class="button">
Add new Concert
</a>
```

CONDITIONAL FIELDS

- Manage intra-field dependencies

- Show only relevant fields, reducing cognitive load

LINKIT

search for content from the wysiwyg or link fields

REFERENCES DIALOG

- add, edit and search content when adding references
